GCCD Environmental Policy

Goals for health, environment, and safety work.

GCCD is a provider of complete and customized control center solutions. Our innovative solutions, combined with high quality products, create a new generation of control rooms.

By enhancing the conditions for conducting effective operations and digital meetings, we contribute to a sustainable everyday life by reducing travel for many businesses and organizations.

GCCD aims to present itself as an environmentally friendly and resource-conscious company, continually striving to improve its environmental performance annually. We impose environmental requirements on all our suppliers and commit to complying with environmental demands and regulations from public authorities at all times.

We offset the carbon footprint of all our flights and expect our customers to consider doing the same.

Some of our environmental goals include:

- Ensuring a good and safe working environment for all employees.
Targeting a maximum sick leave of 1.5%.
- Implementing waste sorting practices and striving for increased reuse of goods and materials.
Targeting a 20% reduction in our residual waste by 2024.
- Selecting environmentally friendly suppliers, equipment, and materials.
By 2025, aiming for at least 75% of our product orders to be made through environmentally certified distributors.

If you wish to learn more about our environmental efforts, please contact us at post@gccd.com
